DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-13 and 31-40 in the reply filed on 02/25/2008 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 and 31-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharon et al. USPN 6,089,389.

Sharon teaches a bottle which has separate compartments for water and powdered formula. The powder is separated by a seal which when the seal is broken allows the powder and liquid mix. The bottle of Sharon is able to be heated and sold without breaking the seal or allowing contamination of the nipple or contents. As the claims are currently written, the method can be performed by a person with a cook top, two pots of water heated to what ever temperature desired and heating the bottles before selling them. The temperatures claimed are standard temperatures to which baby formula should be heated. Furthermore the limitation of the full bottle unit being sealed in a bag though not taught by Sharon is an obvious change to because it keeps the entire unit clean.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPNs 5,863,126, 5,419,445, 2,831,419 and 6,464,104.
